

Tenex Health TX[®] System Ultrasound-Guided Percutaneous Tenotomy & Fasciotomy Symposium & Cadaver Lab

AMSSM SUN, APRIL 14, 2019

Marriott Marquis Houston Hotel | Hunterscreek and Clearlake Rooms

Discussion and lab with hands-on demonstration of the *Tenex Health TX System[®]* and *TX MicroTip*.
Over 85,000 procedures performed since 2012.

FACULTY

Bernard F. Morrey, MD
Professor of Orthopaedics
Mayo Clinic, Rochester, MN
Past President AAOS

Champ L. Baker, Jr, MD
Past President AOSSM
Emeritus Chairman Hughston
Foundation, Columbus, GA

Mederic M. Hall, MD
Board of Directors, AMSSM
Associate Professor
University of Iowa, Iowa City, IA

LABORATORY INSTRUCTORS

Tariq Awan, DO

Assistant Prof Dept of Ortho Medicine
University of Michigan. Team physician
for Univ of Michigan men's hockey.
Consultant for Univ of Michigan &
Eastern Michigan University athletics.

Nicholas Moore, MD

Detroit Medical Center. Team
physician for Detroit Red Wings.

Tony Joseph, MD

Clinical Faculty Dept of Family Medicine
for University of Washington and Idaho
State University. Former head team
physician for Idaho State University.

Charles Peterson, MD

Clinical Instructor Family Med, Mayo
Graduate School and MidWest Univ
AZCOM. Team physician for Arizona
Diamondbacks, Arizona Cardinals and
Chicago Cubs Spring Training. Arizona
Sports Med Cntr, OrthoArizona, Phoenix.

Stacy Lynch, MD

Associate Clinical Professor, PM&R,
Froedtert-Medical College of Wisconsin.
Team physician for Menomonee Falls
High School.

Adam Pourcho, MD

Associate Professor Swedish Sports
Medicine Fellowship. Head team
physician for Seattle Storm (WNBA).
Instructor for AMSSM advanced
ultrasound course.

Kenneth Mautner, MD

Associate Prof Dept of PM&R and Dept
of Orthopaedic Surgery Emory University.
Team physician for Atlanta Hawks, Harlem
Globetrotters, Atlanta Braves and Georgia
Tech. Co Ed – Atlas of MSK Ultrasound.

Anne Marie Zeller, DO

NorthShore Medical Cntr
Orthopaedic Institute.
Clinical Instructor University
of Chicago.

AGENDA

7:00 PM – Tenex Health technology overview:
rationale and documented results - Morrey

7:05 PM – Experience with gluteus
tendinopathy - Baker

7:10 PM – My personal experience – Hall

7:15 PM – Panel discussion and Q&A

7:25 PM – Cadaver lab stations: Pelvic (3);
Shoulder and Elbow (3); Knee (1) and Foot (2)

TX2 MicroTip (2 inches)

Visit our Booth #510. AMSSM 2019 Annual Meeting.
Marriott Marquis, Houston, TX. Exhibit Dates April 13 - 15.

Tenex Health, Inc. | 26902 Vista Terrace, Lake Forest, CA 92630

RESTORE FUNCTION WITH
Tenex Health TX[®]

Treat diseased soft tissue and restore musculoskeletal
function without invasive surgery

TENEX
HEALTH

Physician Experience

James Andrews, MD

Andrews Institute, Gulf Breeze, FL. Team physician for University of Alabama, Auburn and Washington Redskins. Past President AOSSM. Member Tenex Health Medical Advisory Board.

“The Andrews Institute and Josh Hackel have used the Tenex Health TX technology from the beginning and now have extensive experience with all anatomic sites. Since our practice is skewed to the competitive athlete, we are especially pleased with the low complication rate and the rapidity at which they can return to a high level of performance.”

Neal Elattrache, MD

Kerlan-Jobe Orthopaedic Clinic, Los Angeles, CA. Team physician for L.A. Dodgers, Rams and Angels. Consultant to MLB, NFL and NBA. Pres. AOSSM (2018-19). Member Tenex Health Medical Advisory Board.

“Along with my colleague, Steve Yoon, we have extensive experience treating many elite and professional athlete patients with Tenex. We have had excellent results with tendinopathy in the elbow, quad/patellar tendon, calcific tendinopathy of the rotator cuff and plantar fasciitis. In fact, this procedure has dramatically decreased the need to operate on these elite athletes allowing them to return much more rapidly.”

Michael Baria, MD, MBA

Assistant Prof. Dept of PM&R Ohio State University. Team physician for OSU. Co-Chief Orthobiologics Program.

“Using the Tenex probe has become a fundamental part of our practice, especially the jumper’s knee program that is designed to help athletes return to sport safely and quickly without pain.”

David Berkhoff, MD

Prof. UNC Department of Orthopaedics, Chapel Hill, NC.

“With almost 7 years experience, it is clear that this technology has become an invaluable tool in my practice. I am especially gratified to see improvement or cure in those who had been resistant to all prior treatments. With the longer TX2 MicroTip and new TXP hand-pieces, I think the indications for using this device will only continue to expand.”

Jonathan Finnoff, DO

Prof. Dept of PM&R, Mayo Clinic, Rochester. Med Director, Mayo Clinic Sports Med, Minneapolis, MN. Team physician for MN Timberwolves, MN Lynx.

“Tenex has opened up a whole new world of treatment options for my patients and has enabled me to effectively treat patients I couldn’t previously help.”

David Petron, MD

Associate Prof. Dept of Orthopaedics, University of Utah. Head team physician for University of Utah football team. Chief Medical Officer, Utah Jazz.

“I’ve found this treatment to be effective in managing high-level athletes as well as weekend warriors suffering from chronic tendinosis. The risk benefit is so strong that I use the device frequently in my practice.”

Walter Sussman, DO

CAQSM, RMSK Clinical Associate Professor of PM&R, Tufts University. Head team physician for UMass and Dartmouth.

“Tenex has changed my practice, and is invaluable to help patients avoid more invasive surgery. Patients recover faster with minimal restrictions, and Tenex is more accessible than many of the other non-covered treatments for chronic tendinopathy.”
